

Fayaz PK

Senior Product Designer | Enterprise AI & B2B SaaS

Bengaluru, India | +91 77608 50975 | fayazpk06@gmail.com

Portfolio: fayazpk06.github.io | linkedin.com/in/fayazpk06

PROFILE

Senior Product Designer with 11+ years across enterprise software and B2B SaaS. Led UX direction for Copilot in Classic Outlook Calendar and owned admin-side Space Analytics design for Microsoft Places from concept to launch. Former studio co-founder who led five designers and partnered across product, engineering, and research.

EXPERIENCE

Microsoft | Jan 2022 - Present

Senior Product Designer | Sep 2025 - Present

- Led UX direction for Copilot in Classic Outlook Calendar, balancing web-desktop feature parity, familiar Windows workflows, and legacy platform constraints; contributed to the Smart Calendar launch.
- Enabled email-to-chat transitions without manually locating participants or context by designing Chat from Outlook. Owned the interaction model and cross-product experience across two products, Outlook and Teams, including their dependencies.
- Helped take Microsoft Places from concept to launch within 12 months, owning end-to-end admin-side Space Analytics design for enterprise Real Estate & Facilities teams managing space planning and workplace operations.

Product Designer 2 | Jan 2022 - Aug 2025

- Designed Outlook sensitivity-labeling experiences for security and compliance updates announced at Microsoft Ignite 2022.
- Refined cross-platform scheduling and delegate workflows through usability studies on UserTesting.com, using research, telemetry, and quality reviews to guide design priorities.

Revv | Later acquired by LegalZoom

Product Designer / Senior Product Designer | Dec 2018 - Dec 2021

- Shipped an exit-intent signup experiment in two days with one engineer; recorded 1,467 conversions from 34,153 visitors (4.3% conversion rate).
- Designed automated student-document workflows for Masai, sequencing a Zapier integration before a native UI. The customer reported turnaround falling from 800+ to 3 hours and operational costs falling 60% across the team-delivered solution.
- Created Slash, a shared Figma library consolidating existing UI into reusable components and patterns, reducing repeated assembly work across the product team.

RedBaton

Co-Founder & Head of Product User Experience Design | Jan 2014 - Dec 2018

- Co-founded the studio and led five designers, working with 10 developers to deliver mobile and web products for startups and enterprises, including Dailyhunt mobile apps and Deloitte taxation tools.

EXPERTISE

Product strategy; enterprise AI; zero-to-one SaaS; interaction design; design systems; workflow automation; prototyping; usability testing; cross-functional leadership.

RECOGNITION & COMMUNITY

3 Microsoft hackathon / FHL wins, including a team first-place finish in the 2024 Security and Privacy in the Generative AI World challenge. Hosting-team member for Friends of Figma Bengaluru's Config 2025 watch party at Microsoft, attended by **200+ practitioners**.
