Profile

Product designer with 11+ years across enterprise software, B2B SaaS, and consulting. Core design contributor to Microsoft Places from concept to launch; lead UX direction for Copilot experiences in Classic Outlook Calendar. Combine product strategy, interaction design, and research with experience leading a team of 5 designers and partnering across product and engineering.

Experience

Microsoft | Jan 2022 - Present

Senior Product Designer | Sep 2025 - Present

Product Designer 2 | Jan 2022 - Aug 2025

- Owned and led admin-side Space Analytics design for Microsoft Places, helping take the product from concept to launch within a year. Partnered with enterprise Real Estate & Facilities teams on experiences supporting space planning and workplace operations.
- Led UX direction for Copilot capabilities in Classic Outlook Calendar, translating modern AI interactions into established Windows workflows. Contributed to the Smart Calendar launch, balancing feature parity, usability, and legacy platform constraints.
- Defined Calendar experiences spanning meeting recap, preparation, Follow Meeting, suggested actions, agenda assistance, and scheduling; combined interaction design, usability validation, and internal-release quality reviews.
- Designed Copilot writing personalization to reflect users' communication styles, incorporating privacy, transparency, notifications, and user control into the experience and navigating approval dependencies.
- Led scenario-based Calendar reviews, comparing Classic and new Outlook and distinguishing UX, functional, and data issues. Synthesized findings into a modernization direction that preserves familiar workflows.
- Designed Outlook security and compliance experiences around sensitivity labels, contributing to updates announced at Microsoft Ignite 2022. Led Outlook Groups design across web and Windows and contributed to the new Groups launch.
- Shape scheduling workflows across Outlook and Teams, including experiences for delegates and executive administrators. Partner with product, engineering, research, and design teams across India and Redmond.
- Ran usability studies through UserTesting.com and used research, telemetry, and quality reviews to guide priorities. Developed experience-direction narratives for senior leadership reviews and organization-wide forums.

Earlier Experience

Revv | Later acquired by LegalZoom

Product Designer / Senior Product Designer | Dec 2018 - Dec 2021

- Joined the early product team and designed B2B document and eSignature workflows from discovery through release, covering proposals, quotes, contracts, and agreements.
- Partnered with leadership, product managers, and engineering on roadmap planning, requirements, and design iteration. Contributed to growth experiments across acquisition, retention, and engagement, using product telemetry as an input.

RedBaton

Co-Founder and Head of Product User Experience Design | Jan 2014 - Dec 2018

- Co-founded the studio and led product design with a team of 5 designers and 10 developers, delivering mobile apps, web products, websites, and brand experiences for startups and enterprises.
- Directed work spanning Dailyhunt mobile apps and Deloitte taxation tools. Worked directly with clients to define requirements and scope, then guided user flows, information architecture, prototypes, and implementation reviews.

SignEasy

User Interface / Graphic Designer | Sep 2014 - Feb 2015

- Designed product interfaces and marketing website experiences for a mobile-first SaaS platform for signing and completing documents across smartphones, tablets, and the web.

Sanity Dismantled

Freelance Graphic Designer | Jan 2014 - Sep 2014

Created branding, marketing, and web design while studying at college.

Design Expertise

Product strategy; zero-to-one product design; interaction design; AI experiences; enterprise UX; B2B SaaS; information architecture; prototyping; usability testing; research synthesis; cross-platform workflows; growth experiments; design quality; cross-functional leadership.

Recognition and Community

3 Microsoft hackathon / FHL wins, including a team first-place finish in the 2024 Security and Privacy in the Generative AI World challenge; the team presented its concept at the IDC Pinnacle Summit.

Hosting-team member for Friends of Figma Bengaluru's Config 2025 watch party at Microsoft, attended by 200+ design, research, and product practitioners. Contributed to Microsoft UX Day hosting teams.

Education

National Institute of Fashion Technology, Bengaluru

Bachelor of Design, Communication Design | 2012 - 2016
